

To whom it may concern,

It disgusts me to hear that with all the problems we have with society today a first class orginiazation like XM Satellite radio has to deal with the ignorance of the FCC. I am an XM subscriber and I enjoy listening to music and other entertaining programing that they offer. Some of which you just cant get on AM or FM Bands. Since I pay for this progromming it is my choice to listen to it, also when XM adds a new feature such as traffic and weather for its PAYING customers they should not have to waste time fighting petition 04-160. All they are trying to do is provide us with a great service. Maybe you should spend your time listening to XM SATELLITE RADIO rather than trying to bother everybody that already does.

Thankyou, JPK
